

# ABOVE FRAME

**ON-TRUX** LTD.  
Roll-off Systems

ON-TRUX Above Frame Roll-off Systems are designed for single axle trucks with 15,000 lbs. – 24,000 lbs. GVWR and can be installed on most new or used vehicles.

The ON-TRUX system gives a truck the ability to interchange truck bodies, transforming one truck into a multi-purpose fleet without a fleet's expense. Reduce costs and increase your productivity.

The ON-TRUX Above Frame System is a hot-dipped galvanized bolt on roll-off system that eliminates the need for clear outside truck frame because the lift cylinders are within the roll-off hoist frame. Making the On-Trux system available on even more vehicles.

(US Patents 6,641,353 & 7,037,062 and Canadian Patent 2,385,129)

  
Can be installed  
on most trucks
